

Package ‘dressCheck’

January 1, 2026

Title data and software for checking Dressman JCO 25(5) 2007

Description data and software for checking Dressman JCO 25(5) 2007

Version 0.49.0

Author Vincent Carey <stvjc@channing.harvard.edu>

Maintainer Vincent Carey <stvjc@channing.harvard.edu>

Depends R (>= 2.10.1), methods, Biobase (>= 2.5.5)

Suggests survival, chron

License Artistic-2.0

c119

*an N=119 expression set based on CEL files from JCO.zip***Description**

an N=119 expression set based on CEL files from JCO.zip

Usage

```
data(c119)
```

Format

The format is:

```

Details

CEL files were obtained from <https://discovery.genome.duke.edu/express/resources/1144/PlatinumJCO.zip> and imported to R using justRMA in Bioconductor's affy package.

The CEL files had names `> sampleNames(c119)[1:5]` `[1] "0074_1772_h133a_872.cel" "0074_1773_h133a_922.cel"`
`[3] "0074_1774_h133a_1451.cel" "0074_1775_h133a_1526.cel" [5] "0074_1776_h133a_1784.cel"`

in which the patient identifiers are embedded as the tokens between the last underscore and the .cel suffix. 'fixedid' is the extracted identifier, which is of the same form as the sample identifiers in the clinical data, OVCclinicalinfo.xls distributed at the Duke website <https://discovery.genome.duke.edu/express/resources/193/OVCclinicalinfo.xls>

The phenoData component of c119 was derived from OVCclinicalinfo.xls and linked to samples by associating the variable OVC TumorID in the spreadsheet with the sample identifiers extracted from the CEL filenames.

Examples

```

data(c119)
## maybe str(c119) ; plot(c119) ...

```

corr116

*Dressman's RMA+SFR corrected quantifications for 116 ovarian cancer samples***Description**

Dressman's RMA+SFR corrected quantifications for 116 ovarian cancer samples

Usage

data(corr116)

```

Examples

```

data(pwLines)
## maybe str(pwLines) ; plot(pwLines) ...

```

Src.probes

Affymetrix probe identifiers for the Src pathway signature of Bild et al.

Description

Affymetrix probe identifiers for the Src pathway signature of Bild et al.

Usage

```
data(Src.probes)
```

Format

The format is: chr [1:73] "213485_s_at" "201128_s_at" "215867_x_at" "201879_at" ...

Examples

```
data(Src.probes)
## maybe str(Src.probes) ; plot(Src.probes) ...
```

srcWts

*Coefficients to weight components of Src pathway to score for activity,
derived from SVD applied to Bild's data*

Description

Coefficients to weight components of Src pathway to score for activity, derived from SVD applied to Bild's data

Usage

```
data(srcWts)
```

Format

The format is: Named num [1:73] -0.1251 -0.1335 -0.1313 -0.0893 -0.1321 ... - attr(*, "names")= chr [1:73] "213485_s_at" "201128_s_at" "215867_x_at" "201879_at" ...

Examples

```
data(srcWts)
## maybe str(srcWts) ; plot(srcWts) ...
```
