---

`logrxaddin`*Creation of the logrx RStudio Addin*

---

**Description**

`logrxaddin` creates the miniUI for the logrx RStudio Addin

**Usage**

```
logrxaddin()
```

**Value**

MiniUI for the logrx Rstudio Addin for submitting an R file to logrx to generate a log for the file.

**Examples**

```
# It is recommended to run the Addin from the RStudio Addin drop down. However,  
# you can call it from the command line.  
## Not run:  
logrxaddin::logrxaddin()  
  
## End(Not run)
```
