customenvs [en]

Some custom environments,
or small patches.

Version 0.41f -- 24/09/2025

https://github.com/cpierquet/latex-packages/tree/main/customenvs

https://forge.apps.education.fr/pierquetcedric/packages-latex

---

Contents

---

1 History

`v0.41f`: Enhancements + new pictos
`v0.41e`: Enhancements with subpackages + new environements (see [fr] doc)
`v0.41d`: Enhancements with subpackages
`v0.41c`: Enhancements with subpackages
`v0.41b`: Bugfix + pre-compatibility with fa5/fa6/fa7 + new pictograms
`v0.41a`: Option noinlinegraphicx for compatibility with MikTeX + Bugfix
`v0.40f`: WhatsApp style for 'Chat'
`v0.40e`: customenvs-icons `v0.1.0`
`v0.40d`: Code enhancements (compatibility with twemojis) + customenvs-tikzpictos `v0.1.4`
`v0.40c`: PictoClippy (customenvs-tikzpictos `v0.1.3`) + Lengths macros
`v0.40b`: PictoCalendar (customenvs-tikzpictos `v0.1.2`) + enhancements
`v0.40a`: PictoTraffic (customenvs-tikzpictos `v0.1.1`) + enhancements
`v0.3.7`: Auxiliary package customenvs-tikzpictos for pictograms
`v0.3.6`: Picto *bullseye+arrow*
`v0.3.5`: Bugfix + pre-compatibility with fa5/fa6
`v0.3.4`: Pictoskill
`v0.3.3`: Annotate image
`v0.3.2`: Alt version of title banner
`v0.3.1`: Box for MCQ
`v0.3.0`: Bugfix with beamer
`v0.2.7`: Key for mixing answers in MCQ
`v0.2.6`: Whell of skills, speedometer
`v0.2.5`: Bugfix with exercices ([fr] macro)
`v0.2.4`: Small box *marker*
`v0.2.3`: Highway signs + sold banners (see [fr] doc)
`v0.2.2`: Flared arrow, with Ti*k*Z
`v0.2.1`: Enhancements for *stars skills* + AutoGrid for Ti*k*Z (see [fr] doc)
`v0.2.0`: Skills with stars (fontawesome5 or Ti*k*Z)
`v0.1.9`: Title banner
`v0.1.8`: Score banner
`v0.1.7`: Small patch for Vignette macro (see `[fr]` documentation)
`v0.1.6`: Small patchs for displayskip + pas-tableur (see `[fr]` documentation)
`v0.1.5`: New macros for boxes with tcolorbox (see `[fr]` documentation)
`v0.1.4`: Create a SMS conversation
`v0.1.3`: Environment for exercise(s) (in french doc)
`v0.1.2`: Pencil of skills
`v0.1.1`: Skills table (only french for the moment...)
`v0.1.0`: Initial version

2 The package customenvs

2.1 Idea

The idea is to propose some classics environments with customizations (some are, for the moment, only in french):

- write in *multicols*, with spacings enhancements;
- present answers for a *MCQ*;
- create a list with *choosen items* (randomly or by numbers);
- present a skill table.

The globa idea is ti propose *user-friendly* environments, with explicit customizations, without using verbose syntax; but there's other solutions, using for example `\vspace` ou `\setlength` or `spacingtricks` package.

2.2 Loading

The package loads within the preamble with `\usepackage{customenvs}`.
Loaded packages are:

- `xstring`, `simplekv`, `listofitems`, `randomlist` and `xintexpr`;
- `enumitem`;
- `multicol`;
- `tabularray`;
- `fontawesome`;

Due to limitations, `enumitem`/`multicol`/`tabularray`/`fontawesome5/6`/`inlinegraphicx` can be *un*loaded by `customenvs` (user must load them manually) via options:

- ⟨`beamer`⟩ for using with beamer;
- ⟨`noenum`⟩;
- ⟨`nomulticol`⟩;
- ⟨`notblr`⟩;
- ⟨`noinlinegraphicx`⟩;
- ⟨`nofa`⟩;
- ⟨`fa6`⟩;
- ⟨`fa7`⟩.

```
%with all packages
\usepackage{customenvs}

%with option to no load some packages
\usepackage[option(s)]{customenvs}
```

2.3 Subpackage customenvs-tikzpictos (v0.20a)

The package `customenvs-tikzpictos`, loaded within `customenvs` (but can be loaded independently), proposes small pictograms.

```
%\usepackage{customenvs-tikzpictos} %only if for standalone

\tkzpicto%
    [keys]
    <tikz options>
    {type=params}

%type= wifi/network/stars/speedo/bullseye/skills/pill/calendar
%params= nb/nblevels (except bullseye) or day/month (calendar)
%key height= len / auto (without depth) / dauto (with depth)
```

Wifi	
Wifi (bars)	
Network	
Stars	
Speedometer	
BullsEye	Battery	
Battery (flip)	
Skills	Pill	
TrafficLight	MiniCalendar	
Clippy	Dball	

2.4 Subpackage customenvs-icons (v0.1.1)

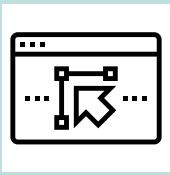
`customenvs` loads, for *small* icons, `customenvs-icons` package.
The idea is to propose small icons, independently of `customenvs`.

```
\usepackage{customenvs-icons}       %only if for standalon

\ceicon%
  [%
    educ=TF,                        %boolean style 'educ'
    design=TF                       %boolean style 'design'
    height=...,                     %(d)auto / height / height+depth
    (d)strut=...                    %box choices (for dim calc)
  ]%
  <includegraphics options>%
  {nom}
```

```
{\Huge X\ceicon{brush}\ceicon[height=auto]{brush}X}
```

```
\ceicon[height=2cm,design]{browser-html}
```



```
\ceicon[height=1in,mathsymb]{pyramid}
```

3 Answers for a MCQ

3.1 Idea

The idea is to propose an environment to present answers for a MQC with `tabularray` (and not `multicols`). It's possible to use 2, 3 or 4 answers (and with 4 answers it's possible to use 2 columns.)

```
\AnswersMCQ[options]{list of answers}<tblr options>
```

The avalailable `options` are:

- `Width`: `0.99\linewidth` by default;
- `Lines`: `false` by default;
- `SpaceCR` for Columns/Rows spacing, within `col/row` or `global`: `6pt/2pt` by default;
- `NumCols`, 2 or 4: `4` by default;
- `Labels` for the labels: `a.` by default;
  - with `box` to use a *Box*;
  - with `a` to *enumerate* `a b c d`;
  - with `A` to *enumerate* `A B C D`;
  - with `1` to *enumerate* `1 2 3 4`;
- `FontLabels`: `\bfseries` by default;
- `SpaceLabels`: `\kern5pt` by default;
- `Shuffle`, for mixing answers: `false` by default;
- `Swap`, for ACBD instead of ABCD: `false` by default.

The list of answers must be given within `answA § answB § ...`.
Specific options for `tblr` are given between last optionnal argument, between `<...>`.

3.2 Examples

```
%default output
\AnswersMCQ{Answer A § Answer B § Answer C § Answer D}
```

a. Answer A **b.** Answer B **c.** Answer C **d.** Answer D

```
\AnswersMCQ[Lines]{Answer A § Answer B § Answer C § Answer D}

\AnswersMCQ[Lines,Shuffle]{Answer A1 § Answer B1 § Answer C1 § Answer D1}

\AnswersMCQ[Lines,Shuffle]{Answer A2 § Answer B2 § Answer C2 § Answer D2}
```

a. Answer A	**b.** Answer B	**c.** Answer C	**d.** Answer D
a. Answer C1	**b.** Answer D1	**c.** Answer A1	**d.** Answer B1
a. Answer D2	**b.** Answer C2	**c.** Answer B2	**d.** Answer A2

```
\AnswersMCQ[Lines,Labels=(1.),SpaceLabels={~~~}]{Answer A § Answer B § Answer C}
```

(1.) Answer A	**(2.)** Answer B	**(3.)** Answer C

```
\AnswersMCQ[Labels={A.},FontLabels={\color{red}\bfseries}]%
    {Answer A § Answer B § Answer C § Answer D}
```

A. Answer A **B.** Answer B **C.** Answer C **D.** Answer D

```
\AnswersMCQ[Labels={1.},FontLabels={\color{red}\bfseries}]%
    {Answer A § Answer B § Answer C § Answer D}
```

1. Answer A **2.** Answer B **3.** Answer C **4.** Answer D

```
\AnswersMCQ[NumCols=2,Labels={A.},FontLabels={\color{red}\bfseries}]%
    {Answer A § Answer B § Answer C § Answer D}
```

A. Answer A
B. Answer B
C. Answer C
D. Answer D

```
\AnswersMCQ[NumCols=2,Swap,Labels={A.},FontLabels={\color{red}\bfseries}]%
    {Answer A § Answer B § Answer C § Answer D}
```

A. Answer A
B. Answer B
C. Answer C
D. Answer D

```
\AnswersMCQ[Lines,NumCols=2,SpaceCR=6pt/10pt,Labels=box]%
    {Answer A § Answer B § Answer C § Answer D}
```

☐ Answer A	☐ Answer C
☐ Answer B	☐ Answer D

```
% checkedbox is \def\MCQanswersbox{\raisebox{-0.2ex}{\faSquare[regular]}}
\AnswersMCQ[Width=10cm,NumCols=2,Lines]%
    {$\displaystyle\frac1x$ § $1+\displaystyle\frac1x$ § $-2x^2+5$ § $-\infty$}
    <rows={1.5cm}>
```

a. $\dfrac{1}{x}$	**c.** $-2x^2+5$
b. $1+\dfrac{1}{x}$	**d.** $-\infty$

4 List with picked elements (random or not)

4.1 Global use

The idea is to:

- create a list of items, the base for choices;
- print the list with picked items.

```
\CreateItemsList{list}{macro}{listname}
```

```
\ListItemsChoice[keys]{macro}{listname}(numbers)<enumitem options>!beamer options!
```

The available `keys` are:

- `Type`: `enum` or `item`;
- `Random`: `false` by default.

The second argument, mandatory and between `{...}` is the macro for the list.
The third argument, mandatory and between `{...}` is the name of the list.
The fourth argument, mandatory and between `(...)` give:

- the number of random items to display, with `Random=true`;
- the numbers of picked itemps, within `num1,num2,...`.

The next argument, optional and between `<...>` gives specific options to `enumitem` environment.
The last argument, between `!..!` gives specific options to `enumitem` environment with `beamer`.

Controls are done:

- to verify that the list doesn't exist (for the creation);
- to verify that that the list still exist (for the display).

4.2 Examples

```
%creation of list ListItems, with macro \mylistofitems
\CreateItemsList%
    {Answer A,Answer B,Answer C,Answer D,Answer E,Answer F,Answer G,Answer H}%
    {\mylistofitems}{ListItems}
```

```
%items random
\ListItemsChoice[Random]{\mylistofitems}{ListItems}(5)
```

1. Answer F
2. Answer D
3. Answer G
4. Answer C
5. Answer H

```
%items picked
\ListItemsChoice{\mylistofitems}{ListItems}(1,4,3,8,2)
```

1. Answer A
2. Answer D
3. Answer C
4. Answer H
5. Answer B

```
%creation of list ListItemsB, with macro \mylistofitemsb
\CreateItemsList%
    {{$\int_0^1 x^2 dx$},{$\int_0^1 x^3 dx$},{$\int_0^1 x^4 dx$},...}%
    {\mylistofitemsb}{ListItemsB}
```

```
%items picked
\ListItemsChoice[Type=item]{\mylistofitemsb}{ListItemsB}(7,2,1,5,3)<label=$--$>
```

-- $\int_0^1 x^8 dx$

-- $\int_0^1 x^3 dx$

-- $\int_0^1 x^2 dx$

-- $\int_0^1 x^6 dx$

-- $\int_0^1 x^4 dx$

5 Pencil of skills

5.1 Global use

The idea is to:

- present of list of categories and skills;
- presented like a pencil.

The code (within CC-BY-SA 4.0 license) is adapted from:
https://tex.stackexchange.com/questions/504092/replicating-a-fancy-bordered-text-style-in-latex/504145#504145

```
\PencilSkills[keys]<tikz options>{listofskills}
```

The style is globally fixed, but there's some customization available.

5.2 The macro

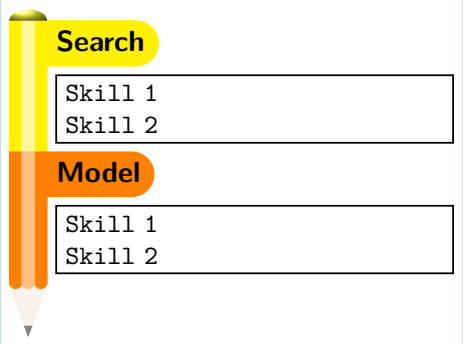
Available `keys` are:

- `FontCateg`: font for the categories;
- `FontBlock`: font for the skills;
- `Colors`: list of category's colors
  `BgCateg1/FgCateg1,BgCateg1/FgCateg1,...`
  (if `FgCateg1` est missing, `black` is used)
- `BlockWidth`: width of skill's block;
- `Scale`: global scale
- `BlackWhite`: boolean for B&W.

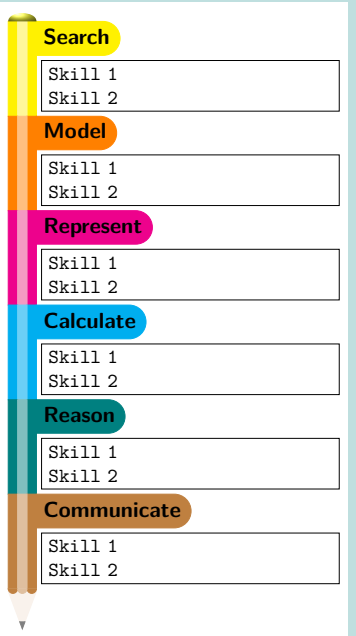
The second argument, optional and between `<...>` gives specific options to `enumitem` environment.
The last argument, mandatory and between `(...)` give the list of categories/skills, within `Categ1/ListSkills1,Categ2/ListSkills2,...`.

5.3 Examples

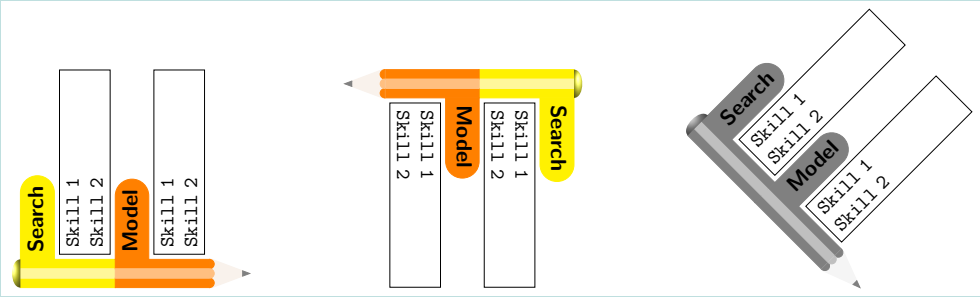
```
%default output
\PencilSkills{Search/Skill 1\\ Skill 2,Model/{Skill 1\\ Skill 2}}
```



```
\PencilSkills[Scale=0.75]%
    {Search/Skill 1\\Skill 2,Model/{Skill 1\\Skill 2},%
    Represent/{Skill 1\\Skill 2},Calculate/{Skill 1\\Skill 2},%
    Reason/{Skill 1\\Skill 2},Communicate/{Skill 1\\Skill 2}}
```



```
\PencilSkills[Scale=0.75,BlockWidth=3cm]<rotate=90>{
    Search/Skill 1\\Skill 2,Model/{Skill 1\\Skill 2}}
\hspace{1cm}
\PencilSkills[Scale=0.75,BlockWidth=3cm]<rotate=-90>{
    Search/Skill 1\\Skill 2,Model/{Skill 1\\Skill 2}}
\hspace{1cm}
\PencilSkills[Scale=0.75,BlockWidth=3cm,BlackWhite]<rotate=45>{
    Search/Skill 1\\Skill 2,Model/{Skill 1\\Skill 2}}
```



6 Score banner

6.1 Global use

The idea is to insert a score banner, with customization.

```
ScoreBanner[keys]{number}
```

```
%default output
\ScoreBanner{}
```

6.2 The macro

Available `keys` are:

- `Height`: height of the banner (without the legend); `1` by default
- `Ratio`: ratio of boxes; `0.6` by default
- `Symbols`: labels; `A,B,C,D,E` by default
- `Legend`: legend (uppercase); `score` by default;
- `Font`: global font; `\bfseries\sffamily` by default
- `ShowLegend`: boolean for the legend; `false` by default;
- `Colors`: colors for boxes; `colorNS1,colorNS2,colorNS3,colorNS4,colorNS5` by default;
- `ScaleSymbols`: scale H/V of labels; `1.25,1.65` by default;
- `Colbg`: background color for select box; `white` by default.

If the list of colors doesn't fill all the boxes, `lightgray` color is used.

```
\ScoreBanner[Legend=Geometry,Height=2]{4}
```

```
%bg of lower part is yellow!25
\def\lstcouleurs{colorNS1,colorNS2,colorNS3,colorNS4,colorNS5,purple}
\ScoreBanner%
  [ScaleSymbols={1.33,2},Height=3.25,ShowLegend=false,Ratio=0.75,
  Symbols={1,2,3,4,5,6},Colors=\lstcouleurs,
  Colbg=yellow!25]{1}
```

7 SMS conversation

7.1 Global use

The idea is to present a conversation of SMS.

```
\begin{ChatSMS}[keys]{name}
  \InSMS(*){time}{msg}
  \OutSMS*(*){time}{msg}
\end{ChatSMS}
```

The style is globally fixed, but there's some customization available.

7.2 The environment

Available `keys` are:

- `height`: height of the window (auto or specific); `auto` by default
- `width`: width of the window; `7cm` by default
- `margin`: margin (L or R) for the bubble `1.5cm` by default
- `color`: *main* color (banner); `teal!75!cyan!75!white` by default;
- `colback`: color for background; `lightgray!5` by default
- `colorin`: color for incoming SMS; `lime!25` by default
- `colorout`: color for outcoming SMS; `teal!25` by default
- `writetxt`: text of sending zone; `Write` by default
- `fonttxt`: bubble's font; `\normalfont` by default
- `avatar`: avatar of contact; `\faAddressCard` by default
- `dispavatar`: boolean for displaying avatar near the bubbles; `false` by default
- `blackwhite`: boolean pour black&white. `false` by default

The argument, mandatory and between `(...)` give the name of the contact.

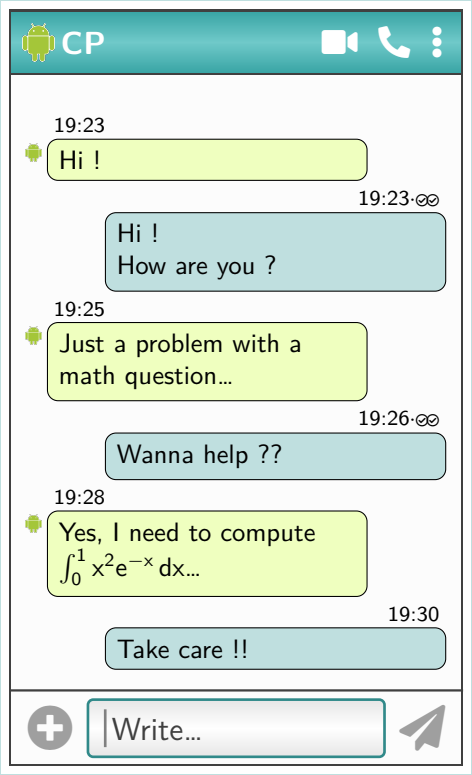
7.3 Macros for the bubbles

Regarding the bubble creation commands, `\InSMS` and `\OutSMS`:

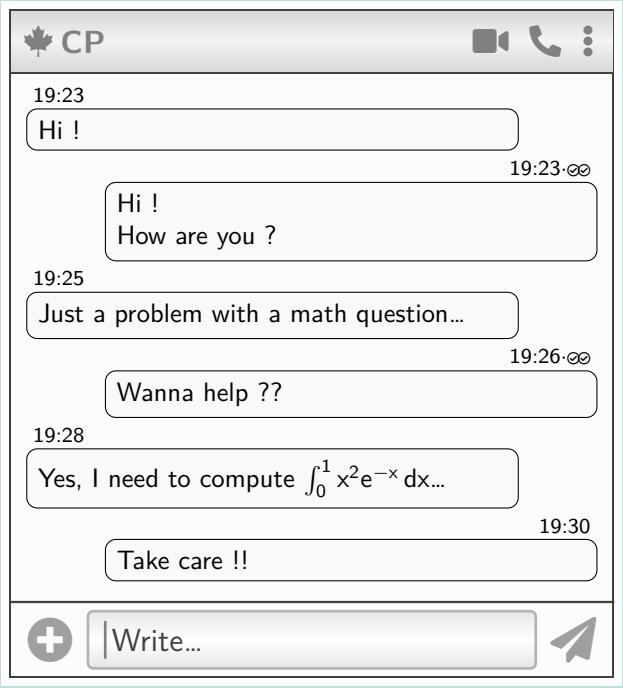
- the *starred* version does not display the *checkmarks* of *good reception*;
- the first mandatory argument is the time to display;
- the second mandatory argument is the message to display (including multi-lines).

7.4 Examples

```
%with a personal image
\begin{ChatSMS}%
  [width=6cm,fonttxt=\sffamily,height=10cm,avatar=img/android,dispavatar]{CP}
  \InSMS{19:23}{Hi !}
  \OutSMS{19:23}{Hi !\\ How are you ?}
  \InSMS{19:25}{Just a problem with a math question\ldots}
  \OutSMS{19:26}{Wanna help ??}
  \InSMS{19:28}{Yes, I need to compute $\mathsf{\int_{0}^{1} x^2e^{-x}\,dx}$\ldots}
  \OutSMS*{19:30}{Take care !!}
\end{ChatSMS}
```



```
\begin{ChatSMS}%
  [width=8cm,fonttxt=\sffamily,avatar=\faCanadianMapleLeaf,blackwhite]{CP}
  \InSMS{19:23}{Hi !}
  \OutSMS{19:23}{Hi !\\ How are you ?}
  \InSMS{19:25}{Just a problem with a math question\ldots}
  \OutSMS{19:26}{Wanna help ??}
  \InSMS{19:28}{Yes, I need to compute $\mathsf{\int_{0}^{1} x^2e^{-x}\,dx}$\ldots}
  \OutSMS*{19:30}{Take care !!}
\end{ChatSMS}
```

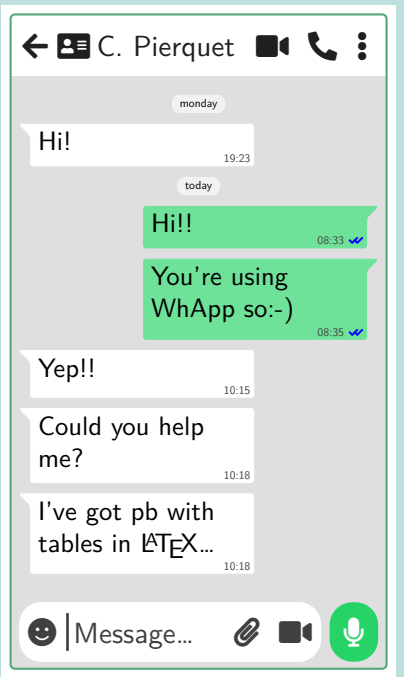


7.5 Style WhatsApp

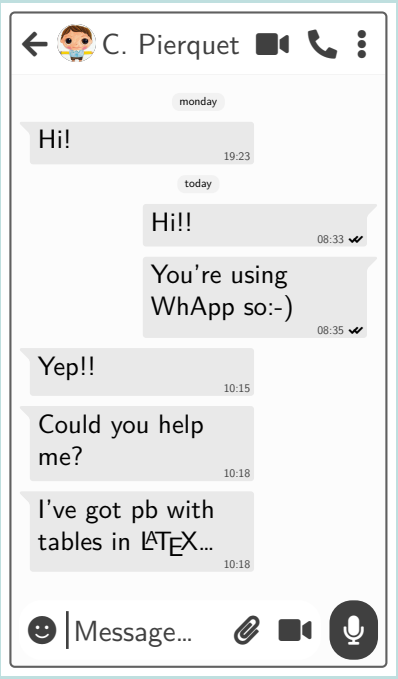
Un style type *WhatsApp* est également disponible, avec un fonctionnement similaire à celui présenté précédemment.
Les clés disponibles sont:

- `height`: `auto` by default
- `width`: `5cm` by default
- `bgcolor`: `lightgray!50` by default
- `receivecolor`: `greenwa!66!white` by default
- `sendcolor`: `white` by default
- `txtwrite`: `Message...` by default
- `fonttxt`: `sffamily` by default
- `avatar`: `\faAddressCard` by default
- `showavatar`: `false` by default
- `bw`: `false` by default
- `txtwidth`: `0.55` by default.

```
\begin{EnvChatWA}{C. Pierquet}
 \WaDate{monday}
 \WaRec{19:23}{Hi!}
 \WaDate{today}
 \WaSend*{08:33}{Hi!!}
 \WaSend*{08:35}{You're using WhApp so:-)}
 \WaRec{10:15}{Yep!!}
 \WaRec{10:18}{Could you help me?}
 \WaRec{10:18}{I've got pb with tables in \LaTeX\ldots}
\end{EnvChatWA}
```



```
\begin{EnvChatWA}[bw,showavatar,avatar=Image/avatar]{C. Pierquet}
 \WaDate{monday}
 \WaRec{19:23}{Hi!}
 \WaDate{today}
 \WaSend*{08:33}{Hi!!}
 \WaSend*{08:35}{You're using WhApp so:-)}
 \WaRec{10:15}{Yep!!}
 \WaRec{10:18}{Could you help me?}
 \WaRec{10:18}{I've got pb with tables in \LaTeX\ldots}
\end{EnvChatWA}
```



8 Title banner

8.1 Global usage

The idea is to propose a banner, made with Ti*k*Z, to present for example a title.
The global style is fixed, but few customization are possible.

```
\tkzBannerTri[keys]{number}{title}
```

```
\tkzBannerTri{01}{Title of document}
```

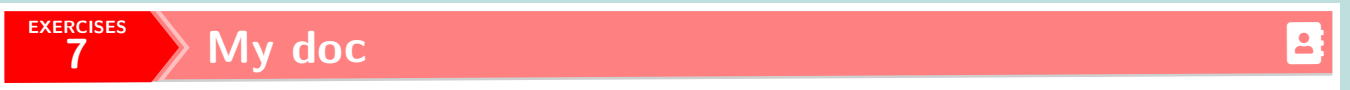
Available `keys` are:

- `height` (`2.5em` by default)
- `width` (`\linewidth` by default)
- `blockwidth` (`2.75em` by default, but can be set to `auto`)
- `coltxt` (`white` by default)
- `fonttxt`
- `swap` (`false` by default, for an other style)
- `maincolor` (`darkgray` by default)
- `collight` (`darkgray!25` by default)
- `colmedium` (`darkgray!50` by default)
- `coldark` (`darkgray` by default)
- `logo`
- `type`
- `dispblock` (`true` by default)
- `num` (`true` by default)
- `customtype`
- `custommulti` (`false` by default)

8.2 Examples

```
\tkzBannerTri
  [maincolor=red,type=EXERCISES,blockwidth=auto,logo=\faAddressBook]
  {7}{My doc}
```

```
\tkzBannerTri
  [maincolor=red,type=EXERCISES,blockwidth=5em,logo=\faAddressBook]
  {7}{My doc}
```



```
\tkzBannerTri
  [maincolor=red,type=EXERCISES,blockwidth=auto,logo=\faAddressBook,swap]
  {07}{My doc}
```

```
\tkzBannerTri
  [dispblock=false,maincolor=teal,logo=\faSchool]
  {}{My doc}
```

```
\tkzBannerTri
  [maincolor=olive,customtype=TP,blockwidth=4em,logo=\faAddressBook,height=4em]
  {7}{My doc}
```

```
\tkzBannerTriAlt
  [maincolor=violet,type=UE3.1,blockwidth=1.25cm,logo=\faGraduationCap,height=1.25cm]
  {TP}{My doc}
```

9 Various commands

9.1 Difficulty levels with stars (fontawesome5)

```
\DiffLevelStars[max level (3)]{level}
```

```
\DiffLevelStars{0}\par
\DiffLevelStars{2.5}\par
\textcolor{teal}{\LARGE\DiffLevelStars[5]{4}}\par
\DiffLevelStars[5]{1.5}\par
```

9.2 Difficulty levels with stars (tikz)

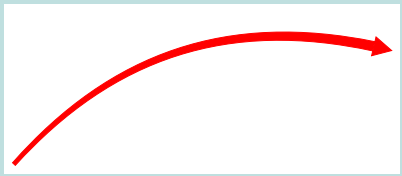
```
\tkzLevelStars[colframe=...,colback=...,offset=...,maxlevel=...,valign=...]{level}
```

```
\tkzLevelStars{2.5}\par
{\LARGE We ty inline \tkzLevelStars{2.25} with score 2.25}\par
{\LARGE We ty inline \tkzLevelStars[valign=false]{1.75} with score 1.75}\par
\tkzLevelStars[colframe=red,colback=yellow,maxlevel=5]{3}
```

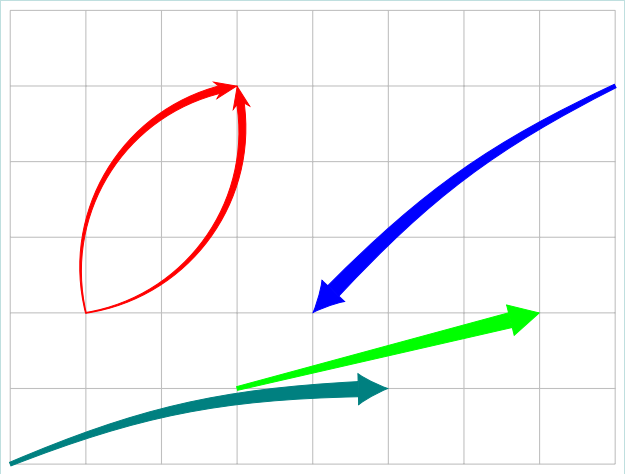
9.3 Flared arrow

```
\tkzFlaredArrow[%
  color=...,            %color of arrow
  arrowsize=...,        %size (auto or H/W )
  bend=...,             %empty for straigth or left/... or right/...
  thickness=...,        %size for the beginning
  factor=...,           %factor for calculing size for ending
  arrowstyle=...,       %style (arrows.meta)
  move=...              %boolean for moving instead coordinates
  ]%
  {begin}{end or move}
```

```
%arrow 0.5mm -> 1.25mm
\begin{tikzpicture}
\tkzFlaredArrow%
  [thickness=0.5mm,factor=2.5,bend=left/30,color=red,arrowstyle=Triangle]%
  {0,0}{5,1.5}
\end{tikzpicture}
```



```
\begin{tikzpicture}
  \draw[thin,lightgray] (-3,-1) grid (5,5);
  \coordinate (A) at (0,0); \coordinate (B) at (4,1);
  \coordinate (C) at (1,1); \coordinate (D) at (5,4);
  \coordinate (E) at (0,1); \coordinate (F) at (0,5);
  \coordinate (G) at (-2,0);
  \tkzFlaredArrow[color=green,arrowstyle=Triangle]{A}{B}
  \tkzFlaredArrow[color=blue,bend=right/10]{D}{C}
  \tkzFlaredArrow%
    [color=red,bend=left/45,arrowstyle=Stealth,thickness=0.1mm,factor=10]%
    {-2,1}{0,4}
  \tkzFlaredArrow%
    [color=red,bend=right/45,thickness=0.1mm,factor=10,arrowstyle=Stealth]%
    {-2,1}{0,4}
  \tkzFlaredArrow[color=teal,move,bend=left/10]{-3,-1}{5,1}
  \end{tikzpicture}
```



9.4 Small markerbox

```
\tbcmarker[color=...,width=...,font=...]{text}
```

```
\tbcmarker{my text}
```

my text

```
\tbcmarker[color=olive,font=\normalfont\normalsize]{my text}
```

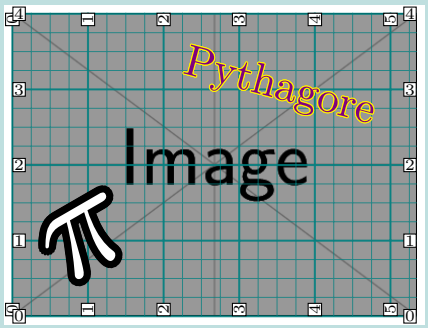
my text

9.5 Annotate an image

The idea is to provide a way of annotating an image, using an environment and a command which are linked to Ti*k*Z.

```
\begin{imgannotate}[keys][includegraphics options]{imagefile with extension}
  \puttxtonimg[tikz node options]{coordinates}{txt}
  \puttxtonimg*[tikz node options]{coordinates within percentage}{txt}
\end{imgannotate}
%====keys
%clip=...      : boolean for clipping img
%node=...      : node name for reusing (remember picture)
%grid=...      : optionnal value for showing helping grid
%subgrid=...   : integer value for subgrid
%gridcolor=...: grid color
```

```
%\usepackage[auto,outline]{contour}
\begin{imgannotate}[grid=1][height=4cm]{example-image.png}
  \puttxtonimg[scale=5,rotate=30]
    {1,1}{\contourlength{0.05em}\color{white}\contour{black}{$\pi$}}
  \puttxtonimg*[scale=1.5,rotate=-15]
    {0.66,0.75}{\contourlength{0.025em}\color{violet}\contour{yellow}{Pythagore}}
\end{imgannotate}
```



```
\begin{imgannotate}[node=IMGTEST][height=5cm]<rotate=10>{example-image-golden.pdf}
  %tikz usual commands
  \draw (IMGTEST.center) node[above=5mm,font=\Huge\ttfamily\bfseries,text=blue] {TEST1};
  \draw (IMGTEST.north west) node[draw,thick,red,inner sep=0.5mm,below
